

## **September 20, 2018 Meeting**

The RG&FC September 20, 2018 program will be “**Water Quality for House Plants**” and will be provided by Steve Gonzalez, past president of the Minnesota Orchid Society.

Steve will discuss what makes better water for plants anyhow to select fertilizers for your plants; he'll also show the effects of fertilizing. We will measure water, fertilizer, root zone PH, and Total Dissolved Solids (TDS). Attendees will be asked to bring a small sample of their home tap water for testing, with specifics to be given prior to the meeting.

Brief alternative: “Learn about water, fertilizers, and how to measure things like PH and Total Dissolved Solids (TDS) - specifics on how to prepare or bring your samples to be measured will be given prior to the meeting.”
