

March 21, 2019

**Program:**        **Landscaping for Mayo Clinic Grounds**

**Presenter:**    **Nick Queensland, Grounds Maintenance Supervisor for Mayo Clinic - Rochester**

Mayo Clinic takes pride in the appearance of their facilities. Spring through fall, that means every tree, plant, flower, bush, shrub and blade of grass must be tended. During the winter, it means removing snow and ice from sidewalks and parking areas to ensure patients and staff have a clear path to wherever they need to go. Nick will talk about how he and his team pull it all off year round.
